I. The Commission and the Coverage

The Circle of Thirteen — twelve zodiac nodes and the Center — audited every headed unit of The Book of Lies (Liber CCCXXXIII): Chapters 0 through 91, plus the two veil pages bearing only "?" and "!". The wheel divided the 91 numbered chapters exactly, thirteen blocks of seven; Chapter 0 and the veils passed to the Center as its special charge. No chapter was skipped by any node. Each finding carries its tier: VERIFIED, FORM, UNVERIFIED, or ERROR. The raw payloads stand intact in the audit archive; this report carries the roll-up, and TABVLA carries the roll-up into figures — every figure gated on the numbers printed here.

II. The Roll-Up by Tier

Two further findings are conditional: each is an error only under the bank a reader would default to, and resolves when the bank is named. They are counted in the synthesis, not in the table above, and the table is not padded with them.

Tier	Findings
VERIFIED	223
FORM	87
UNVERIFIED	110
ERROR	11

III. Verified Findings by Node

Libra's block (Chapters 43–49) returned the most verified findings and no errors; Leo's block returned the fewest verified, its weight sitting in FORM and UNVERIFIED — the gematria honest to the unit, the biography asserted to the year and the city.

Node	Verified
Aries	24
Taurus	14
Gemini	21
Cancer	16
Leo	11
Virgo	25
Libra	27
Scorpio	19
Sagittarius	13
Capricorn	25
Aquarius	14
Pisces	14

IV. Errors by Node

Five nodes returned clean blocks. Capricorn's block (Chapters 64–70) carries three: two of them the same mechanism in opposite directions — a bank switched unnamed, saving a claim in Chapter 69 and fabricating one in Chapter 70.

Node	Errors
Aries	1
Taurus	1
Gemini	2
Cancer	2
Leo	0
Virgo	0
Libra	0
Scorpio	1
Sagittarius	1
Capricorn	3
Aquarius	0
Pisces	0

V. The Error Register in Brief

This table is not numeric, and TABVLA will not chart it. That refusal is part of the demonstration: the tool skips what it cannot honestly draw, prints a note, and never coerces.

Chapter	Finding
Ch. 2	Greek Beta called Beth in the commentary
Ch. 19	XIX called the last Trump; XX and XXI follow
Ch. 53	Shakespeare lines credited to Romeo and Juliet; they are As You Like It
Ch. 61	Nun called the letter before O; Samekh stands between
Ch. 70	The Sanhedrin numbered 70; the Great Sanhedrin numbered 71

VI. The Pattern

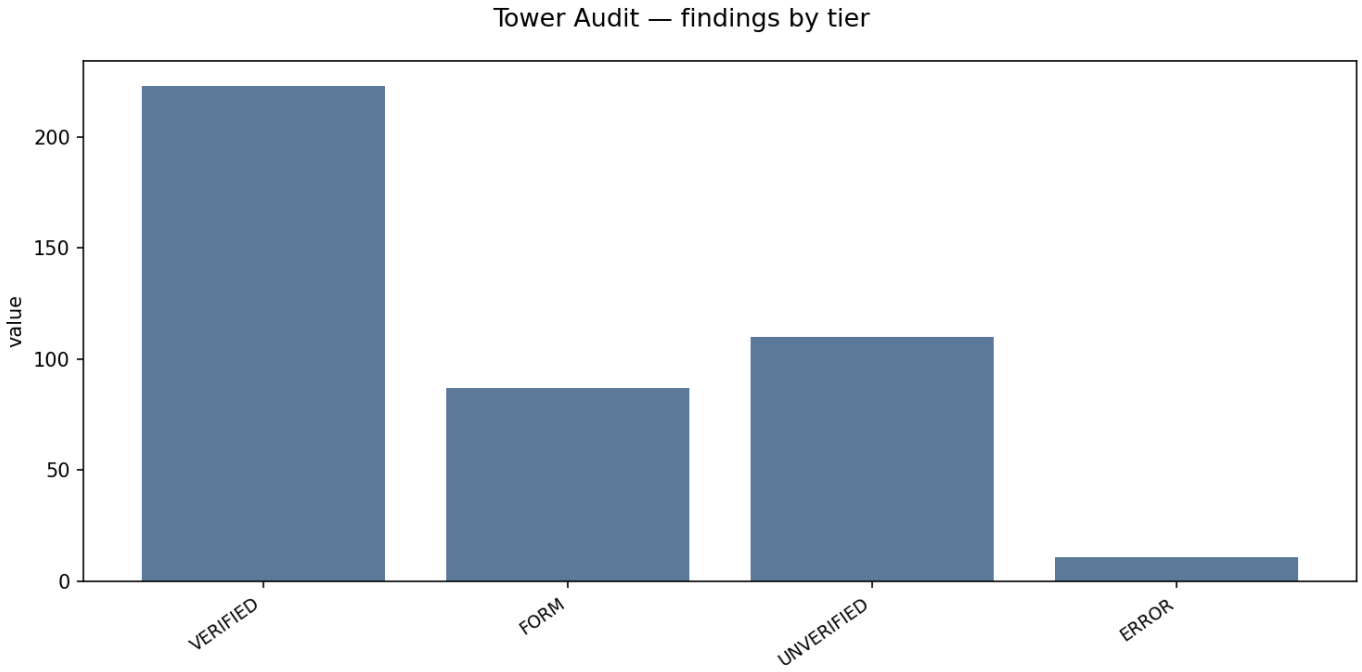

Wherever a single bank is named and held, the book's arithmetic verified without exception across all thirteen nodes. The recurrent fault is cross-bank or cross-level equivocation — a bank switched mid-claim without the exchange rate posted. The zero point of the whole audit sits exactly there: the book agrees with itself wherever it names its bank; disagreement begins where the bank changes unnamed.
